DEVOLD[®] SAFE

FLAME RETARDANT WOOL / LENZING BLEND

DEVOLD[®] SAFE is a versatile wool underwear that covers the need for protection in occupations where one is exposed to heat and flame during the work day. Safe is knitted with FR[®] Lenzing, merino wool and Nega-Stat[®], with polyamide reinforcement. Nega-Stat[®] is a specialyarn that gives the garments optimal antistatic protection. Safe is the lightest flame retardant underwear in the Devold Protection collection. Since it's knitted in a rib structure, the underwear is very elastic and follows your body movement. Safe has a high percentage of merino wool, and therefore keeps your body dry and comfortable even during high activity.
